

FOR REVIEW

What's on the ground.

A current snapshot of the markets LeadCurate covers, the kinds of distress signals we extract, and what individual records look like. We pull directly from official county portals — tax collectors, assessors, clerks of court, GIS open-data hubs — not licensed reseller feeds. That distinction shows up in how fresh our data is and what kind of seat-scarcity model we're able to offer.

AT A GLANCE

The numbers.

the live intake formREFRESH LEAD VS MAJOR
RESELLERS**30–60d**

fresher on the same names

COVERAGE**Twenty-one markets across twelve states.****North Carolina**

- **Mecklenburg** (Charlotte) — parcels with owner detail, vacant land, active city liens, probate/inherited (72 verified decedent-estate parcels)
- **Wake** (Raleigh) — parcels, property records, daily-refreshed delinquent file — full 500-record delivery product live and sold
- **Guilford** (Greensboro) — tax-delinquent records, pre-foreclosure with auction dates. Also our first **Ground Floor** candidate: JetZero's \$4.7B/14,500-job aerospace campus at Piedmont Triad Airport, groundbreaking underway
- **Forsyth** (Winston-Salem) — parcels with property address and owner

Texas

- **Tarrant** (Fort Worth) — full county tax roll, refreshed weekly
- **Dallas** — full county certified appraisal roll, parcels
- **Harris** (Houston) — landing pages identified; bulk feed pending browser-driven pull

Georgia

- **Fulton** (Atlanta) — current tax parcels, historical year files
- **DeKalb** (Atlanta east) — tax parcels current and prior year
- **Cobb** — landing pages identified; pulls pending

New York

- **NYC** — tax lien sale lists across all five boroughs, citywide building code violations (2.4M records)
- **Erie** (Buffalo) — filed delinquent taxpayer list, in-rem foreclosure documents

Kentucky

- **Jefferson** (Louisville) — parcels, active pre-foreclosure court cases, code violations, lien-holder final orders
- **Fayette** (Lexington) — parcels, vacant land, PDR property records

Indiana

- **Marion** (Indianapolis) — parcels with owner detail and assessed values
- **Allen** (Fort Wayne) — published delinquent property list, tax-delinquent lane live

Other

- **Shelby, TN** (Memphis) — upcoming tax sale property extract, direct S3 source most competitors don't know exists
- **Maricopa, AZ** (Phoenix) — assessor master files: residential, commercial, apartment, secured.
- **Cuyahoga, OH** (Cleveland) — tax parcels plus recent parcel sales, high-equity lane live (top single parcel on record: \$62.2M assessed equity)
- **Charleston, SC** — annual tax sale listings
- **Greenville, SC** — annual tax sale information
- **Jefferson, AL** (Birmingham) — landing pages identified; pulls pending

Don't see your market above? Every county publishes public property records, and we pull directly from the source — tell us what you're working and we'll build it.

DISTRESS LANES

Ten ways to slice the data — eleven categories on the live intake form.

A lane is a category of distress signal that defines what kind of buyer the record is worth selling to. The same county can support multiple lanes simultaneously, each serving a different buyer profile without overlap.

#	LANE	WHAT IT IDENTIFIES
1	Tax delinquent + absentee	Out-of-state owner with overdue property tax
2	Tax delinquent in-state	Local owner unable to pay
3	Pre-foreclosure court filing	Active foreclosure case with filing and sale dates
4	Tax sale upcoming	Property going to auction in the current cycle
5	Foreclosure auction history	Closed and pending sales with sale prices
6	Vacant land specialty	Undeveloped lots with identifiable owner
7	High-value absentee residential	Single-family rentals owned by out-of-state entities
8	City liens / municipal violations	Active liens, code enforcement actions
9	Citywide code violations	Large-scale violation data (NYC alone has 2.4M records)
10	Recent sales / cash buyer ID	Comp data and buyer-side intelligence

Not every lane is available in every market. The match between county data and lane depends on what the county publishes. The available lanes per market are tracked in the working inventory.

WHAT A RECORD LOOKS LIKE

Four representative examples.

Owner names and addresses below are drawn from public records. Specific dollar amounts are left intact to show data depth.

Tax-delinquent absentee owner · Guilford County, NC

Owner	JJ & R COMPANY
Mailing address	209 Glen Way NE, Brookhaven, GA 30319
Property parcel	16563 (Guilford County, NC)
Assessed value	\$1,021,800
Tax year	2017 (nine years overdue)
Bill amount	\$13,927.14
Interest accrued	\$9,912.04
Total due	\$28,132.08
Bill due date	2017-08-31

Source: Guilford County tax delinquent report · pulled 2026-06-18

Active pre-foreclosure · Jefferson County, KY

Property	2616 Hale Ave, Louisville, KY 40211
Neighborhood	Parkland
Action filed	2025-11-05
Sale date	2026-06-26
Days to sale	8 days from pull date
Case number	25CI401179

Source: Louisville Metro Property Foreclosures · pulled 2026-06-18

Institutional absentee single-family owner · Mecklenburg County, NC

Owner	RM1 SFR PROPCO B LP
Mailing address	600 Galleria Parkway Ste 300, Atlanta, GA 30339
Property	901 Amanda Dr, Charlotte, NC
Property use	Single-family residential
Year built	1985
Heated square footage	2,502
Building value	\$534,400
Land value	\$142,500
Total assessed value	\$678,100

Source: Charlotte parcel-lookup · pulled 2026-06-18

Upcoming tax sale · Shelby County, TN

Property	554 N Fourth, Memphis, TN
Parcel ID	001072 00017
Tax sale code	TS2302 (current cycle)
County GIS record	gis.register.shelby.tn.us

Source: Shelby County Trustee tax sale extract · pulled 2026-06-18

Each record in a delivery file carries the equivalent of these fields plus a score and rank, sorted highest priority first. Source URLs and pull dates are stamped on every batch for buyer verification.

FRESHNESS

Why our data lands earlier than the platform tools.

The major industry tools — PropStream, BatchLeads, DealMachine — license their property data from upstream wholesalers like CoreLogic, ATTOM, and DataTree. Those feeds refresh on cycles of thirty to ninety days. A record showing as tax-delinquent in PropStream today may belong to an owner who paid their bill forty-five days ago. The signal is stale.

"A name that hits the public record on the first of the month is in our system within days. The same name does not appear in PropStream's data for another 30 to 90 days."

THE FRESHNESS STORY IN ONE SENTENCE

SOURCE	REFRESH CADENCE
Wake NC delinquent file	Daily
Louisville KY foreclosure cases	Daily
Tarrant TX tax roll	Weekly (every Monday)
Most other open-data hubs	Weekly to monthly
Major reseller licensed feeds (industry standard)	30 to 90 days

The practical effect: we are routinely 30 to 60 days ahead of the platform-based competitors on the same names.

COMPLIANCE POSTURE

Built into every record.

- Property-record data only. No skip-traced phone numbers, no email addresses, no DNC scrub in the entry and mid tiers. That is deliberate.
- Every batch carries the source URL and source pull date. Buyers can verify our claims directly against the county portal we drew from.
- We do not scrape behind paywalls or anti-bot controls. Every source is an official public-record portal, an open-data hub, or a legally required publication.
- Buyers handle their own outreach, skip trace, DNC compliance, and TCPA decisions. LeadCurate provides data and educational tools only and does not guarantee deals.

NEW — GROUND FLOOR

Market-selection intelligence, not property records.

A separate product line from the property lists above: real, sourced, dated capital-investment signals that show where money is moving before it shows up in property values or headlines. Every claim traces to a real dollar figure and a public source — no speculation, no "up and coming neighborhood" hype.

Guilford County, NC — Greensboro (first live candidate)

Signal	JetZero aerospace manufacturing campus, Piedmont Triad International Airport
Commitment	\$4.7 billion, 8M sq ft facility, 14,500 high-wage jobs
Stage	Groundbreaking underway (high confidence)
Existing data	222,645 real parcels already pulled for Guilford County — zero new scraping needed to pair this signal with property data

Source: JetZero company newsroom, verified via independent business press · confirmed 2026-07-03

Also tracking: Durham County, NC (AbbVie, \$1.4B pharmaceutical campus, announced April 2026) and Cherokee County, SC (USA Rare Earth, \$1.2B magnet factory, Blacksburg).

WHAT'S NEXT

The path from here.

Three counties remain to bring online (Harris TX, Cobb GA, Jefferson AL). Each requires browser-driven extraction rather than direct download — a focused work session each, not a fundamental obstacle.

Beyond data coverage, the next investments are around automation (recurring monthly pulls without human triggering), enrichment (deeper cross-referencing across datasets within a county), and customer-facing delivery infrastructure (turning the existing delivery format into a recurring subscription with payment automation).

The data foundation is solid. The path from here is execution.

LeadCurate · Data Inventory · v4 · Last updated 2026-07-03

This document is the canonical inventory and is updated as markets and lanes change.

Better data. Cleaner workflow. No hype.
